F4ET-Med thermostatic wall-mounted mixer as DN 15 wall-mounted mixer, for wall mounting with lockable swivelling spout, for surgical sanitary facilities in the healthcare and nursing sector. Opto-electronically controlled, triggered by hand movement with subsequent automatic switching to body detection. Thermostat with metal handle, including lever for reduced-touch operation, and adjustable, turn-proof temperature stop. With the option of manual thermal disinfection. For connecting to hot and cold water. Control electronics, stagnation-free hygiene solenoid valve cartridge, flow rate controller 9.0 l/min, 6 V lithium battery (CR-P2) and sensor in the scald-protected safe-touch housing, polished chromium-plated

brass. Decoupled from the tap housing, volume-reduced, smooth water flow from low-lead brass (lead proportion ≤ 0.2%), and without nickel coating. With thermal insulation components to reduce heat transfer from the tap housing to the cold-water line. Self-emptying spout with laminar jet controller. With adjustable and lockable connections with backflow preventers and strainers, fully covered by depth-adjustable screw rosettes. 296 mm projection. Activated water hygiene flushing 24 hours after last activation, safety switch-off for continuous reflection and saving of statistical data. With option for parametrisation and communication via optional, bidirectional remote control.
